General information

The objective of this conference is to foster interdisciplinary collaboration, and explore the future of the Nanoscience and Nanotechnology applied to Analytical Chemistry.

This XII edition will be held in the vibrant city of Oviedo (Spain), organized by the Nanobioanalysis Group at the University of Oviedo in collaboration with the Specialized Group on (Bio)analytical Science and Technologies of the Royal Spanish Society of Chemistry (GCTbA-RSEQ).

With a rich program featuring plenary/invited lectures, oral and poster presentations, we aim to create a dynamic and inspiring environment for learning and exchange.

Topics

- Analytical nanometrology
- Applied analytical strategies involving nanomaterials
- Detection, characterization, and quantification of nanomaterials
- Nano(bio)sensors
- Nanomaterials for sample preparation
- Nanotoxicology and risk assessment
- Other nanotechnological applications and miniaturized nanosystems
